

Rattlesnake Mountain Shooting Facility

TCSA Highpower Discipline Annual Match Records

Competition Year 2023

Introduction:

This is a list of the high winning score for each type of match currently hosted at the RMSF by the TCSA High Power Discipline. Match descriptions are located on the web site at the following link (<https://www.tcsahighpower.org/match-descriptions>). The all-time record for each is **bolded**, with the earliest score remaining the all-time record if later tied. For the current year, a mid-season update is issued at the end of July.

Shooting at Rattlesnake Range is an outdoor sport and the winds for one match may be quite readable and make scoring easier than other times when the Snake is in full form, the winds are tricky, and high scores are unlikely. Some great scores will be eclipsed each year.

In addition to these Annual Match Records, starting in 2017, Match Directors began to report other notable scores that are not annual match records. That table of “cleans” appears in Appendix A.

Records for discontinued matches are contained in Appendix B.

Please provide match reports and any corrections or additions to Phil Keuhlen at pjkeuhlen@gmail.com.

NOTES:

- Some TCSA club level matches use targets at ranges other than their original design distance for some match stages. The subtended angle of the scoring rings will be different than designed for such usage. Scores tend to be higher if targets are used at a shorter range than their designed use range, and lower if used at a longer range than designed. This means that caution must be used if comparing these scores to other matches nationwide. Scores will only be comparable when targets are used at their standard distances.
- Starting in 2022, % scores are tabulated for matches such as PR-22 matches that have differing stages and possible scores from match to match. The high % will be the basis for match records going forward.

Rattlesnake Mountain Shooting Facility

TCSA Highpower Discipline Annual Match Records

Competition Year 2023

2023 Competition Season Summary:

The Tri Cities Shooting Association's Highpower Discipline hosted an ambitious match schedule of 64 smallbore (rimfire) and 32 fullbore (centerfire) matches during the 2023 season. As usual, weather conditions at the Rattlesnake Mountain Shooting Facility often made conditions "sporty" but few matches were cancelled or modified due to weather. The 2023 season saw the addition of a weekend Mini Palma match with standard club provided ammunition and further expansion of PR-22 match offerings. Fullbore Open Any Rifle (OAR) matches at 500 and 800 yards replaced previous 300/500, 500/800 and Beat The Heat Matches. 2023 saw the return of the Washington Service Rifle and Southern District Championship to RMSF, last shot at this venue five years ago in 2018.

11 shooters shared honors for annual match records, the highest score in a match series for the 2023 season, and 2 shooters shot notable clean scores that did not win their respective matches.

- 2023 Match record holders: Michael Storer, John Julian, Kaleb Harvey, Tod Hendricks, Mike Sowa, John Schneider, Ben Cook, Mike Bunch, Seth Gardner, Jeff Davis, and Tom Halecki .
- 2022 Notable Cleans: Tom Halecki and Glen Buxton.

Of particular note, 7 shooters set 9 new all-time club records. These included:

- Michael Storer, 1245-34X, Korean War Memorial Service Rifle Match
- John Julian, 480-11X, NMC/EIC Match
- Kaleb Harvey, 200-18X, 200/300 Yard OAR Match
- Tod Hendricks, 986-45X, 5X1000 Yard Match, F Open
- Mike Sowa, 953-25X, 5X1000 Yard Match, F/TR
- Ben Cook, 246-4X, Hi Card, 50 Yard USBR Match
- Mike Bunch, 399-30X, 50 Yard Vintage Smallbore Match, Aggregate
- Mike Bunch, 200-15X, 50 Yard Vintage Smallbore Match, Hi Card
- John Julian, 443-18X, Mini Palma (Common Ammo)

Competition Year 2023

Appendix A Notable Cleans

This table is a list of “clean” scores shot over the course of any given day, that were not the high winning score for that match. Match Directors began reporting such scores for recognition beginning in 2017, so many earlier notable performances have undoubtedly been lost to time.

A “clean” or a “possible” in shooting terminology means that all shots were 10’s or X’s, but does not mean all shots were X’s. In the highly unlikely event that someone shoots all X’s in a match on a given day, that is defined as a “super clean”, and will be listed separately.

The reasons a “clean” target might not win a match are threefold. First, it may have been beaten by another shooter scoring a higher X count to win the match. Second, it may have been shot in a multi-card or multi-stage match that was won by a higher aggregate score. Finally, it may have been shot in a match format using a handicap or bonus system that was won by a shooter with a greater bonus or lesser handicap. “Cleans” that are annual match records appear in the annual record tables and are not duplicated here.

This table of “cleans” is probably not complete. If you know of a daily “clean” in a match that is not recorded here, please let Phil Keuhlen at pjkeuhlen@gmail.com know the details and the score will be added to this table of “cleans”.

Notable “Clean” Match Scores that were not Match Winners
